КОНЦЕПЦИЯ РАЗВИТИЯ МАТЕМАТИЧЕСКОГО ОБРАЗОВАНИЯ В РОССИЙСКОЙ ФЕДЕРАЦИИ

Утверждена распоряжением
Правительства Российской Федерации
от 24 декабря 2013 г. N 2506-р

Математика в России должна стать передовой и привлекательной областью знания и деятельности, получение математических знаний - осознанным и внутренне мотивированным процессом

Образовательная область «Познавательное развитие»

Развитие познавательно-исследовательской деятельности

Формирование элементарных математических представлений

Приобщение к социокультурным ценностям

Ознакомление с миром природы

Целевые ориентиры ФГОС ДО:

ребенок проявляет любопытность, задает вопросы, касающиеся близких и далеких предметов и явлений, интересуется причинно - следственными связями (как? почему? зачем?), пытается самостоятельно придумывать объяснения явлениям природы и поступкам людей. Склонен наблюдать, экспериментировать. **Обладает начальными знаниями** о себе, о предметном, природном, социальном и культурном мире, в котором он живет. Знаком с книжной культурой, с детской литературой, обладает элементарными представлениями из области живой природы, естествознания, математики, истории и т. п., у ребенка складываются предпосылки грамотности. Ребенок способен к принятию собственных решений, опираясь на свои знания и умения в различных сферах действительности.

Краткое содержание разделов программы по ФЭМП в ДОУ:

«**Количество и счет**»: представления о множестве, числе, счете, арифметических действиях, текстовых задачах.

«**Величина**»: представления о различных величинах, их сравнения и измерения (длине, ширине, высоте, толщине, площади, объеме, массе, времени).

«**Форма**»: представления о форме предметов, о геометрических фигурах (плоских и объемных), их свойствах и отношениях.

«**Ориентировка в пространстве**»: ориентировка на своем теле, относительно себя, относительно предметов, относительно другого лица, ориентировка на плоскости и в пространстве, на листе бумаги (чистом и в клетку), ориентировка в движении.

«**Ориентировка во времени**»: представление о частях суток, днях недели, месяцах и временах года; развитие «чувства времени».

Понимание родителями значимости математического развития для успешности обучения в школе (по результатам опроса)

- Да, это очень важно для усвоения математики в школе
- Да, но это не самое важное
- Нет, считаю, что этому должен учить учитель в детском саду - воспитатель
- Нет, это не влияет на успешность
